

Bulk Colostrum Powders

- **Whole Colostrum Powders**

Whole colostrum powder is colostrum in its most natural state. Nothing is added or taken away except water. APS BioGroup uses proprietary processes to stabilize the natural colostrum oils in whole colostrum. This enables APS whole colostrum powders to have a three year shelf life.

- **Skim Colostrum Powders**

APS BioGroup offers a vast portfolio of standardized and high protein skim colostrum powders. These low fat colostrum powders are available with different immunoglobulin levels.

- **Immulox® Products**

Immulox® products are derived from colostrum supplemented with extra Proline-rich-Polypeptides (PRPs). Immulox® is produced exclusively by APS BioGroup using our proprietary patented processes and is available in a consumer-ready liquid Immulox® Spray and as an Immulox® bulk colostrum powder.

- **Custom Formulated Colostrum Powders**

APS BioGroup has both wet and dry blending capabilities to design and manufacture custom formulated colostrum powders to meet specific customer requirements.

All APS colostrum powders have a shelf life of three years.
